
**Anti-K2/Spice, synthetic
cannabinoids, IgG**

Rabbit Polyclonal Antibody
Cat. #1066 Lot P0709

LIMITATIONS: THIS PRODUCT IS FOR RESEARCH USE ONLY AND IS NOT APPROVED FOR THERAPEUTIC OR DIAGNOSTIC USE.

Background:

The Tulip BioLabs, Inc. Anti-K2/Spice (synthetic cannabinoids), Cat. #1066, is a rabbit polyclonal IgG antibody. It has been used in a competitive ELISA format to test the presence of JWH-018, JWH-073, JWH-122, JWH-019, JWH-081, AM-2201 and related compounds and their metabolites in samples such as human urine (see Arntson *et al*, 2013). Cross-reactivity of various tested compounds are listed in Table 1.

Note: If this antibody is used in an immunoassay to detect synthetic cannabinoids, suspect test samples must be confirmed using an alternative analytical method, for example LC-MS-MS.

Immunogen:

JWH-018 conjugated to a carrier protein.

Supplied As:

2 mg/ml of protein A purified rabbit IgG in phosphate buffered saline with 0.05% sodium azide preservative.

Storage and Stability:

Stable for 1 year from date of shipment when stored at -20 or -70°C. Stable for at least 1 month at 4°C. Avoid freeze/thaw cycles.

Specificity and Comments:

Recognizes the synthetic cannabinoids JWH-018, JWH-073, JWH-122, JWH-019, JWH-081, AM-2201 and related compounds and several of their metabolites (see Table 1 and A. Arntson *et al*. (2013) *J. Analyt. Toxicol.* **37** 284).

Applications and Suggested Dilutions:

ELISA (for 96-well plate coating use 1-3µg/mL)
Note: This antibody is used in the Cat. #4300 K2/Spice ELISA kit.
Other methods not tested.

Please note: This information is intended as a guide. The optimal concentrations must be determined by the user.
