

AKB48 x HRP conjugate**Cat. #8702**

Lot Q0000

LIMITATIONS: THIS PRODUCT IS FOR RESEARCH USE ONLY AND IS NOT APPROVED FOR THERAPEUTIC OR DIAGNOSTIC USE.

Background:

The Tulip BioLabs, Inc. AKB48 x HRP conjugate, Cat. #8702, is the synthetic cannabinoid AKB48 covalently conjugated to horseradish peroxidase (HRP). It has been used in conjunction with Cat. #1087 Anti-AKB48, synthetic cannabinoid, rabbit IgG to make a competitive ELISA to test the presence of AKB48 metabolites in samples such as human urine. The complete ELISA kit is available from Tulip BioLabs, Cat. #4700.

Composition:

AKB48 conjugated to horseradish peroxidase (HRP).

Supplied As:

0.5 mL in a BSA-stabilizing buffer containing a preservative.

Storage and Stability:

Stable for at least 3 months from date of shipment when stored at 4°C. For long-term storage, aliquot and freeze at -70°C. Avoid freeze/thaw cycles.

CAUTION: Sodium azide inactivates the peroxidase activity of this product. Do not use in any buffers!

Specificity and Comments:

Useful in conjunction with Cat. #1087 Anti-AKB48, synthetic cannabinoid, rabbit IgG as components of a competitive ELISA.

Applications and Suggested Dilutions:

ELISA (1/1000 dilution in stabilizing buffer)
Note: This conjugate is used in the Cat. #4700 AKB48 Synthetic Cannabinoid ELISA kit.

Please note: This information is intended as a guide. The optimal dilutions must be determined by the user.
